

Introduction to the new Hog Store and Staff @ the How-To Building Center

Exciting things are happening inside the How-To Building Center. One is the addition of our hog barn supply store. Inside you will find a large portion of the store dedicated to livestock parts and equipment, especially targeting the hog barn needs in our area.

If you like to do your own service work, we have a full line of parts to supply your needs from syringes to medicators and feed systems. On the other hand, if mechanical work is not your forte' we are here to assist you with our onsite Service Technician Ryan Raines. Ryan thrives at meeting the needs of our customers and is just a phone call away in any emergent or appointed need.

It's never too late to winterize your barn. We are ready for your winter needs with a full line of Guardian heaters by LB White and Purifier furnaces through AP Supply.

You can call Ryan or Toots to set up your hog barn audit appointment any time.
